

Molitecnica Sud: experience, innovation and satisfaction

Also this year **Molitecnica Sud** is present at Ipack-Ima 2018, the trade fair specialized in processing and packaging food and non-food held in Milan - Zona Rho Fiera from 29th May to 1st June 2018. Technological innovation and internationality are the key words of the fair which has reached its 24th edition and Molitecnica Sud, which has always focused on research and innovation, could not miss this event. The company is present in Hall 1 Stand C87 and Hall 3 Stand B79, the former is dedicated to the milling sector and the latter to storage and accessories for pasta factories. In the Pasta-Bakery & Milling pavilion, a team of highly specialized technicians is on hand to show why Molitecnica Sud is appreciated both nationally and internationally:

▷ Firstly, for their experience - The company has been operating in this sector for over fifty years and is specialized in the design, construction and maintenance of plants for mills, bakeries, pasta factories, feed mills, storage, metalworking and auxiliary machines.

▷ Secondly, for innovation and research - The continuous evolution of the global market has not stopped Molitecnica Sud, but has seen the company increasingly committed to widening the range of products, offering highly flexible, practical and innovative systems and solutions which are always in line with the best performance and the most effective use.

▷ Thirdly, for customer satisfaction - The strength of a team is precisely the ability to offer its customers a tailor-made project, follow them during the implementation and assist them with the after-sales service. The quality and reliability of the work is the reason why the company is chosen again and again for the maintenance and modernization and/or expansion of plants.

In conclusion, competence, technological innovation and the use of "Made in Italy" materials make Molitecnica Sud products exclusive and unique pieces.
